Pleasant Valley, NY, a quick thaw after a cold snap.

Credit: Naomi Brooks

Appalachian Trail, Putnam Valley. What happened here?

Credit: Patricia Grove

Southern Adirondack Park, NY.
Note the bending trees.

Credit: Gary Hoehenberger

Early August, Mohonk Mountain, NY.
Credit: Melody Montgomery

**In the woods, Taconic, CT.
I think it's a limestone outcrop, but
most of the nearby stone is gneiss. This
forest was once cleared for pasture.
Probably abandoned in the 1800s.**

Credit: Peter Neely

18" yellow birch alongside the West Branch of Pleasant River in Maine. There is beaver activity on tributary streams, but this is a mid-sized river. What were they thinking?

Credit: David Publicover

Spring and runnel adjacent to trail - an old wood road. Was this to water horses or oxen?

Credit: Barbara Restaino

About 200 ft. above an old wood road in the SE Catskills off Peekamoose Road, from the trailhead to Ashokan High Point. What were these cairns for?

Credit: Barbara Restaino

Punam County Stone Chamber

Putnam County has a number of these stone chambers. The lower one is oriented toward the winter solstice.

Putnam County Solstice Chamber

Putnam County Trench and Berm

A trench and berm in the middle of the woods in Putnam County, NY. Part of a mine? Part of a military fortification?

Credit: Kellye Rosenheim

Central Adirondack, NY stream in winter with bent cherry tree over stream.

Credit: Robert and Urling Searle

Middlesex Fells in Medford, MA.

Credit: Barbara Strell

Hyde Park, NY. Used to be called beaver pond. Many standing dead trees and tall mounds/clumps of grass. Forest on either side that slopes upward.

Credit: Elizabeth Tolliver

Hyde Park, NY. Multiple cedar trees on a hill dead. Since 2016, they have been rapidly dying.

Credit: Elizabeth Tolliver

Bowdoin Park, NY. A very large tree amongst smaller trees.

Credit: Elizabeth Tolliver

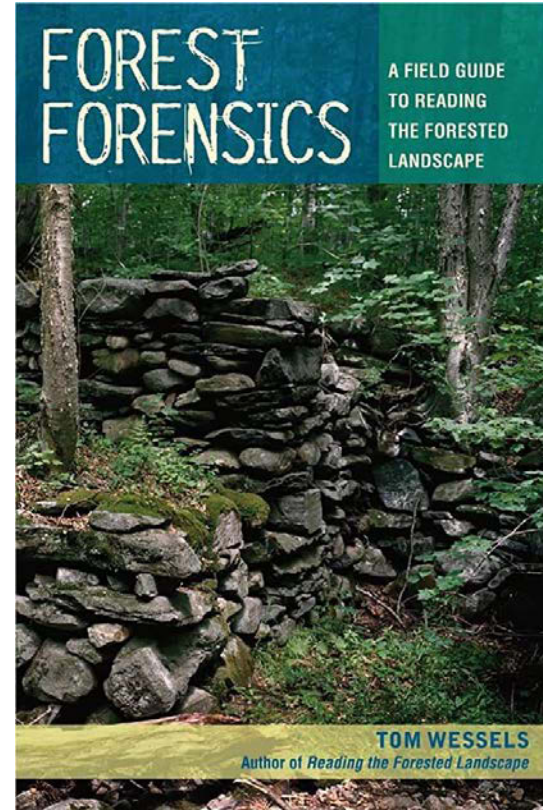

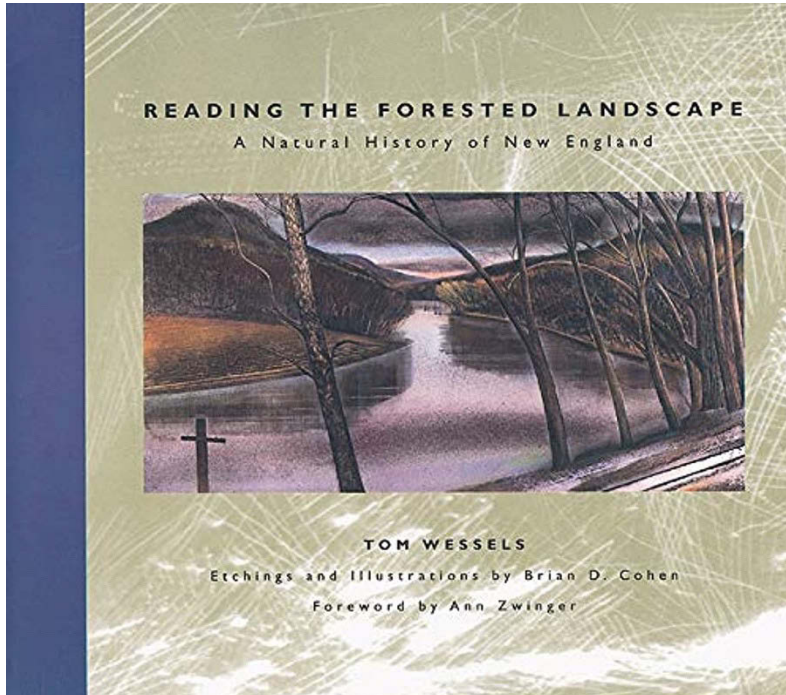

Brewster, MA. Woodland road through a white pine stand. From the road one can see a "clearing" with many downed trees. Photo tries to show the transition from not impacted to impacted woodland. Looking northerly.

Credit: Erin Hilley

A few years ago, there were tornado touch downs on the Cape; prior there were micro-bursts.
