Question: I wonder....

Hypothesis (statement that I can test):

Results:
Data bags put on branches:
Date bags collected:

| 1 | 2 | 3 | 4 | 5 |
| :--- | :---: | :---: | :---: | :---: |
| Bag <br> \# | Amount of <br> water (mL) | Area of 2 leaves <br> (cm2) calculate <br> area with graph <br> paper | Amount evaporated per <br> square centimeter (mL/cm2) <br> divide column 4 by column 3 | Amount of water that was in <br> the leaf (mL) Subtract column 8 <br> by column 7, 1 gram of water <br> equals 1 mL of water |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |

Is your hypothesis correct? Explain.
